EPSON®

EXCEED YOUR VISION

Public Speaking

Do you want to become a powerful public speaker before your peers? Public speaking is designed to teach presentation skills for informative, persuasive, debate, and impromptu styles of speech delivery. It will also focus on the written aspect of speech organization, as well as how to be confident and comfortable in front of an audience. Students will learn how to research, outline, and deliver short, informal presentations as well as longer speeches.

Drawing, Painting and Digital Arts

Master the fundamental techniques of Drawing & Painting while expanding your conceptual boundaries and developing your own artistic vision! Students will create images to tell stories, convey information, and evoke emotions. Students will learn techniques, create projects, and use processes that will allow them to build a great portfolio.

Acting Academy

Acting Academy will allow kids to expand their skills in acting, public speaking and performing. Students will participate in a drama and stage performances that will help build confidence and creativity that can have a dramatic positive impact on academic, personal and professional success. Students will engage in activities such as speech training, mini-scripts and improvisations in small groups, monologues, character analysis, auditioning-skill development and production techniques.
