

Pipe Cleaner Coral Instructions

1. Cross two pipe cleaners to create an “X”

2. Fold one side of the “X” towards you

3. Wrap the same side of the “X” you folded around the other pipe cleaner until you have wrapped the whole side of the pipe cleaner. The finished product should look like a “Y”

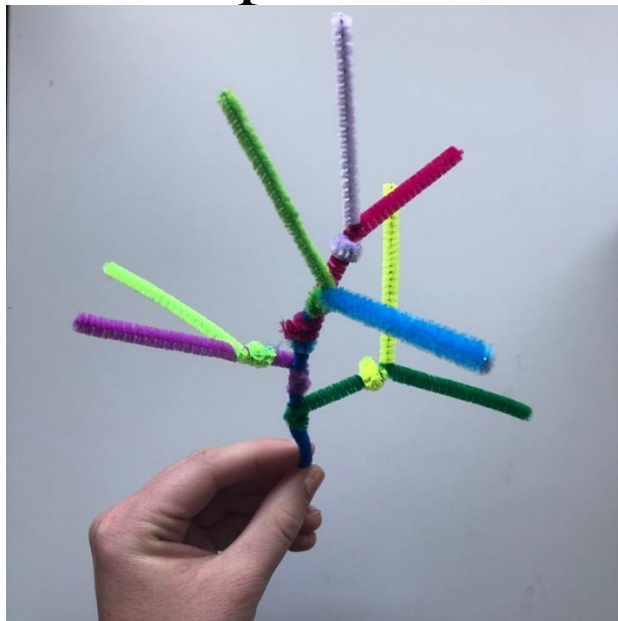

4. Repeat steps 1-3 until you have lots of “Y’s”

5. Use one pipe cleaner as your stem

6. Attach the “Y’s” you previously created to your stem pipe cleaner using the same cross, fold, and wrap method in steps 1-3

7. Add as many pipe cleaners as you'd like until your coral reef is complete!
